## Dear Bob

This is a response to your inquiry regarding the status of MO(V) and HILV-IIIB received by Biotech Research Laboratory from LTCB in 1984. As I recall, I received MO(V) about a month before I received HILV-III. Later LTCB designated HTLV-III as HILV-IIIB. At the time of cryepreserving HTLV-IIIB, I have told the technicism to footnote in her log book MO(V) = HTLV-IIIA to distinguish it from HTLV-IIIB. I hope this will clarify some confusion about cell designation. MO(V) AND HTLV-IIIB are definitely distinct and separate cells I received from LTCB.

Sincerely yours

ROBERT C Y TING, Ph.D.
