Memorandum

Date August 22, 1983  
From Chief, Laboratory of Tumor Cell Biology, DCT, NCI  
Subject Communication and Coordination of Etiopathogenesis Studies on AIDS  
To Vinc Director, NCI  
Throu. Vince Chabner, Director, DCT, NCI  
Peter Fischinger, Associate Director, NCI

Vince: It would help my thinking and planning if the various research problems and projects in NCI on AIDS etiopathogenesis in some way went through my office. I believe I could make better input to Peter and you if this were the case, it would minimize excess duplication, it would also allow me to bring input to the individuals. If you think this is wise, please send out a directive to this effect - specifying that I should be informed of the nature of the projects and be kept informed of results.
